

Rajnikant Raman

Engineering Manager | FinTech & Payments | Amsterdam, Netherlands

rajnikant7008@gmail.com | +31 627273340 | rajnikant7008.github.io | linkedin.com/in/rajnikant7008

Summary

Engineering leader with 11+ years building mission-critical payment systems at global scale. Track record of scaling platforms 50x, hiring and growing high-performing teams, and establishing org-wide engineering culture and standards. Skilled in performance management, OKR-driven planning, technical strategy, and aligning engineering with business outcomes across product, commercial, and partner stakeholders.

Experience

Adyen – Engineering Manager Jul 2022 – Present

Amsterdam, Netherlands | Senior Engineer to Engineering Manager, promoted within 8 months

- Lead IPP Scalability team of 6 engineers, scaling platform 50x – enabling 1M+ concurrent connections with latency under 100ms for global merchants across millions of devices.
- Grow engineers through hands-on hiring, performance management, and structured mentorship – building an engineering culture of ownership, career development, and clear progression at all levels.
- Own cross-functional technical strategy across product, commercial and partner stakeholders – translating business goals into engineering roadmaps and delivery commitments.
- Establish org-wide engineering standards – defining ways of working, quality benchmarks and developer experience practices across the organization.

Zettle by PayPal – Senior Backend Developer May 2019 – Jun 2022

Stockholm, Sweden

- Delivered compliance solutions supporting migration of millions of merchants across Europe in response to regulatory and banking license changes.
- Developed KYC/KYB risk systems for merchant onboarding and activity monitoring, improving detection of high-risk events and platform security.
- Evolved compliance platform architecture using Java, AWS and event-driven design to deliver scalable, secure backend systems.

BankBazaar – Senior Software Engineer Dec 2016 – May 2019

Bangalore, India

- Architected a customer data platform using Java, Kafka and Cassandra – processing millions of real-time events to build unified customer profiles, powering personalization and recommendation capabilities.
- Built org-wide ETL pipelines processing tens of millions of events, enabling enterprise reporting and data-driven decision-making.
- Mentored engineers and drove cross-team alignment on platform design and data architecture decisions.

Snapdeal – Software Engineer Jul 2015 – Nov 2016

Bangalore, India

- Built end-to-end ML pipeline for product ranking – data pre-processing, feature extraction, model training and real-time prediction – enhancing discovery across high-traffic e-commerce.
- Built scalable UGC platforms and APIs serving 5K+ TPS with p99 latency under 10ms.

Skills

Leadership: Technical Strategy, Org Design, Team Scaling, Hiring, Performance Management, Engineering Culture, OKR Planning, Talent Development, Stakeholder Management, Operational Excellence

Technical: Java, Python, Kotlin, Go, Spring Boot, Dropwizard, Terraform, Pulumi, Docker, Kubernetes, Nomad

Data & Infrastructure: Kafka, RabbitMQ, PostgreSQL, CockroachDB, Cassandra, Redis, MongoDB, Elasticsearch, Grafana, Splunk

Cloud & Architecture: AWS, Google Cloud Platform, Distributed Systems Design, WebSocket, Real-time Streaming

Achievements

- **Speaker, Adyen Annual Conference 2025** – Presented Public Cloud vision to 1,500+ attendees.
- **PayPal Spot Award 2021** – Led European compliance migration across multiple stakeholder teams.
- **Snapdeal Gold Award 2016** – Built end-to-end ML product ranking pipeline.
- **Director's Gold Medal 2015** – Ranked 1st in B.Tech, NIT Patna, GPA 9.12.

Education

National Institute of Technology, Patna – B.Tech, Information Technology Jul 2011 – May 2015

GPA: 9.12 | Rank: 1 | Director's Gold Medal

Publications

- **Privacy Enhancement in E-Mail Clients** – Springer International Publishing Switzerland, 2016.
- **Product Quality Prediction in a Large E-commerce Environment** – Internal Research, Snapdeal, 2016.
